

## General Recommendations

PLP's Thermolign Suspension is specifically designed for application on aluminium based high temperature conductors. The suspension unit is rated for a continuous conductor operating temperature of up to 250°C.

Maximum 30° line angle for single suspension and up to 60° line angle for double suspension with yoke plate.

### Features:

- Dual layer Armor Rod design for maximum mechanical and thermal performance.
- Minimal heat transferred to stringing hardware and insulators.
- Cushion inserts surround the conductor for ultimate protection of susceptible conductor wires against dynamic loading.

For Application Procedures, visit the PLP website.

### SAFETY CONSIDERATIONS

- This product is intended for a single (one-time) use and for the specified application, although it may be re-applied for re-tensioning within 90 days from initial installation.
- Do not modify this product in any way.
- This product is intended for use by qualified linesmen only.
- When working in the area of energised line with this product, extra care should be taken to prevent accidental electrical contact.
- For proper performance and personal safety, be sure to select the proper size PREFORMED™ products before application.
- PREFORMED™ products are precision devices. To ensure proper performance, they should be stored in cartons under cover and handled carefully.
