

ENVIRONMENTALLY FRIENDLY

ALTERNATIVE ENERGY PRODUCTS

PLP's solar power products and systems supply sustainable energy solutions for the benefit of the planet and our children's future. The company provides energy efficiency solutions and consultation, to maximize the renewable energy plant.

From supplying the base products for solar applications or complete kit systems to design and integration from start to finish in turnkey solutions, PLP is a key component in sustaining your energy future.

PLP can deliver these systems today, making them financially viable and environmentally friendly. Through our professional approach and consultation, we can provide (start-to-finish) solutions using the highest quality components, making the choice for Solar Energy a key investment.

> SOLAR PV ENERGY SYSTEM

- Grid Connect Packages & Custom Systems
- Remote (off grid) Standalone Power Systems
- Commercial Solar Power Plants
- Solar Mounting Systems

> SOLAR THERMAL

- Solar Hot Water Heating
- Solar Thermal Air Heating

> ENERGY EFFICIENCY SOLUTIONS

- Energy Auditing Services
- Power System Efficiency Upgrades
- Consultation on Energy Reduction

Commercial Installation
