

# Bird Flight Diverter

## Spiral Bird Flight Diverter - Swan

Bird Flight Diverter are designed to make overhead lines visible to birds and provide an economic means of reducing bird flight hazards.

The fitting is light in weight, offers little wind resistance and is easily and quickly applied by hand or by hot stick. The positive grip on the conductor ensures that the Bird Flight Diverter remains in the applied position and cannot move along the span under aeolian vibration or other conditions. The diverter section increases the visible profile of the cable or conductor to a degree necessary to ensure safety, but avoids an undesirably bulky outline.
